**SOUNDS LIKE:** The Arcade Fire shows up at Sufjan's cabin with blankets and board games.

#### ABOUT THIS CURSED HOUSE

It is finally here and we couldn't be more proud. Made for everyone living within Detroit and its surrounding populous comes "**This Cursed House**", the debut LP from 7 southern michiganders with an obviously envious eye to the north. Recorded in the dark of winter on a sound board originally built and used in the early 80's to mix portions of 2nd & 3rd installments of the Star Wars trilogy, comes an unexpectedly warm record of art-folk arrangements featuring dual cellists, melodica, shout & response vocals, glockenspiel and rhodes piano. The band known as **CANADA** has fast become the answer to the stuffy misaligned garage scene that has largely monopolized Detroit's weary image in the minds of the masses. THIS is what music from the mitten is about...it's the scene you should've been hearing from all along.

#### PRESS

"It could very well be the best pop album to come out of the ever-fruitful Detroit music scene in 2006, and considering the quality of the competition, that's no small praise."

- ALL MUSIC GUIDE

"...a dark yet warm collection of symphonic folks songs that should appeal to anybody with an ear for well-crafted, lush pop."

- THE TRIP WIRE
